Job Application for Graduate software Engineer

Dear Sir/Madam,

I am a passionate and ambitious computer science graduate who loves coding, my previous internship at iFlytek convinced me than ever that I want to pursue a long-term career in software engineering.

My first sole project in year 3 of university was Road Tracking in Aerial Images that written in Python, it showed my analytical mindset, my passion and a tireless desire to explore the unknown. I want to gain new knowledge and not afraid to share my ideas and own point of view.

Your graduate scheme contains the knowledge and technology that I crave, I can have a deeper understanding of the technology I have used, and I can familiarize myself with and master those technology or tools that I have not been exposed to yet.

I am a strong problem-solving person and willing to take any different opinions from my colleagues and leaders. Above skills mentioned were agreed in my last internship feedback.

I plan to work and settle in the UK after graduation, your position suits my personal career plan. Looking forward to speak with you if you feel I would be a strong candidate for this role.

Yours sincerely,

Zhaoyu Zhang
